
IBM Data Analyst Module 4 Unit 5 Live session (contextual copy)

Learning outcome:

- LO1:** Explain basic Python data types, and when type conversion is needed.
- LO2:** Apply expressions, variables, and string operations.
- LO3:** Implement lists and tuples in Python.
- LO4:** Use dictionaries and sets in Python.
- LO5:** Describe conditions, branching, objects, and classes.
- LO6:** Explain exception handling, build a function, and work with condition statements.
- LO7:** Demonstrate how to read and write files using Python libraries.
- LO8:** Explain how to use Pandas.
- LO9:** Discuss the use of NumPy to create one and two dimensional arrays.
- LO10:** Explain APIs and how to work with different file formats using Python.
- LO11:** Discuss data collection and web scraping.

In this live session, you'll have an opportunity to engage with your tutors and peers through a demonstration of web scraping. During the session, you're encouraged to ask questions and discuss topics related to the module content. These sessions aim to foster collaborative learning and an interactive exchange of ideas. Be prepared to engage openly with your peers and tutor.

What to expect

In the live session, the tutors will guide you through the step-by-step process of completing a hands-on activity and discuss related topics. You'll be invited to contribute via the live chat, where you can post your experiences engaging with the activity and ask questions in the live session chat window.

You can join the session via the Zoom LTI in the navigation bar.

Reminder:

It is important to have earphones and a microphone (and quiet surroundings) to participate in the session. You are advised to log in to the session 10 minutes early to enable your audio and visual settings and to test your connection before the session begins.

For guidance on how best to conduct conversations and interactions during live sessions, please review the live session etiquette guide before the session.
