

IBM Data Science

Module 3 Live Session

WELCOME: GETTING STARTED

Welcome to the live class discussion. Follow the steps below to get started:

Step 1: Click on the speaker icon on the top left to enable your audio.

Step 2: Click the speaker drop-down arrow on the right of the icon and set your volume to 100% or “High.”

Step 3: Click on “Meeting” in the top-left corner and run the “audio setup wizard” to test your audio volume, select your microphone, and test your microphone volume.

Step 4: If you would like to ask a question, post it in the chat.

WELCOME: GETTING STARTED

Important points to note

If you get disconnected, click the URL to the meeting room on the Online Campus to re-enter the main room.

The chat function is located on the bottom right of your screen.

THE PURPOSE OF LIVE SESSIONS

The purpose of a live session is to give you a chance to engage with a live demonstration and discuss the module content in real time with your fellow students and tutors.

In this live session, you will share the results of the activities from Unit 2 and get feedback from your tutor. You are encouraged to comment on each others' work as well to get a better sense of the questions everyone has about the process.

Please upload screenshots of your code and results.

TASKS [1/2]

- Reset the index, save, and display the first five rows of the `tesla_data` dataframe using the `head` function. Upload the screenshot of the results.
- Display the last five rows of the `tesla_revenue` DataFrame using the `tail` function. Upload a screenshot of the results. Make sure you are using the data from the table named “Tesla Quarterly Revenue” on the website.
- Reset the index, save, and display the first five rows of the `gme_data` DataFrame using the `head` function. Upload a screenshot of the results.
- Display the last five rows of the `gme_revenue` DataFrame using the `tail` function. Upload a screenshot of the results. Make sure you are using the data from the table named “GameStop Quarterly Revenue” on the website.

TASKS [2/2]

- Use the `make_graph` function to graph the Tesla stock data, and provide a title for the graph. Upload a screenshot of your results.
- Use the `make_graph` function to graph the GameStop stock data, and provide a title for the graph. Upload a screenshot of your results.
- Add the GitHub link or the URL to your assignment in Watson Studio using the share-notebook lab instructions.

DISCUSSION

- Were you able to achieve the required results during your activity?
- If you only achieved partially correct code or results, what areas do you think you could improve on with more guidance?

CONSOLIDATION AND CONCLUSION

Thank you for engaging with this session.

Please indicate if you have any further questions using the chat function.

THANK YOU FOR JOINING!

This live session has come to an end.

The recording of this session will be made available on the Online Campus.

Please feel free to continue the discussions in the discussion forums.

Thank you for joining!
