
IBM Data Science M6U3 Live session

Learning outcomes:

LO1: Explain the purpose of data visualization types and common Python plotting libraries.

LO2: Use Python libraries to create basic visualizations from real-world datasets.

LO3: Use different plot types and advanced visualization methods in a dataset.

LO4: Design a set of visualizations that clearly communicate insights from a complex dataset.

In this live session, you will engage directly with your Tutor and peers to create effective visualizations using Matplotlib, Seaborn, and Folium, based on the preceding activity. The session is designed to help you consolidate your learning, including importing data, exploring key trends, and customizing plots to communicate insights. You are encouraged to share your work, ask questions, and reflect on your approach to this activity.

The Head Tutor will guide the session, discussing the key steps of the activity workflow and highlighting insights from each section. While there is no formal submission in this session, you can share screenshots of your outputs—charts, tables, or model results—to foster collaborative discussion and peer feedback. This is an opportunity to discuss challenges you faced, explore alternative approaches, and deepen your understanding of effective visualizations.

You are invited to contribute actively via the live chat, sharing your experiences, questions, and observations. The session aims to create an interactive and supportive environment where you can learn from your peers, receive guidance from the Tutor, and strengthen your data analysis and modeling skills. Prepare to engage openly, exchange ideas, and celebrate the progress you've made throughout the project.

You can join the session via the Zoom LTI in the navigation bar.

Reminder:

It is important to have earphones and a microphone (and quiet surroundings) to participate in the session. You are advised to log in to the session 10 minutes early to enable your audio and visual settings and to test your connection before the session begins.

For guidance on how best to conduct conversations and interactions during live sessions, please review the live session etiquette guide before the session.
