THE PURPOSE OF LIVE SESSIONS

The purpose of a live session is to give you a chance to engage with a live demonstration and discuss the module content in real time with your fellow learners and tutors.

THE PURPOSE OF THIS LIVE SESSION

This live session will provide a hands-on demonstration of:

- Creating and customizing visualizations in Excel using pivot tables; and
- Building interactive dashboards in IBM Cognos Analytics and Google Looker Studio using the supplied dataset.

Building on the previous activity, the tutor will walk through:

- How to analyze car sales and profits for each dealer using different visualization tools;
- Techniques for presenting insights – such as quantity sold by dealer, profit trends by date and model, and recall and sentiment analysis – in a clear, visual format;
- The importance of formatting, chart types, and layout choices when preparing reports and dashboards for decision-making.

The session emphasizes how visualization choices and key performance indicator (KPI) metrics can provide different perspectives on the same dataset, making for more informed business decisions.
