
IBM Data Analyst M2U3 Live session

Learning outcomes:

LO1: Explain the basics of spreadsheet applications, including key terms, navigation, and keyboard shortcuts.

LO2: Demonstrate how to work with data in Excel using formulas and functions.

LO3: Discuss the importance of data quality, privacy, and ethics.

LO4: Apply data cleaning methods to remove duplicates, inaccuracies, empty rows, and resolve inconsistencies.

LO5: Use data analysis techniques and key functions in a spreadsheet.

LO6: Apply pivot table features in Excel to manipulate data, perform calculations, and explore real-world applications.

In this live session, the tutor will demonstrate how to perform a data analysis based on the preceding activity (analyzing data using Excel).

During the session, you are encouraged to ask questions, share your thoughts, and discuss any relevant topics. These sessions aim to foster collaborative learning and an interactive exchange of ideas. Be prepared to engage openly with your peers and tutor.

What to expect

In the live session, the tutor will guide you through the step-by-step process of completing a hands-on activity and discuss related topics. You will be invited to contribute via the live chat, where you can post your questions and experiences of engaging with the activity.

You can join the session via this link:

Reminder:

It is important to have earphones and a microphone (and quiet surroundings) to participate in the session. You are advised to log in to the session 10 minutes early to enable your audio and visual settings and to test your connection before the session begins.

For guidance on how best to conduct conversations and interactions during live sessions, please review the live session etiquette guide before the session.
